

FOLLOW ME! Technology develops CAM software that generates optimal input data for milling as well as additive manufacturing using digital models. We are focused primarily on the development of *hyperDENT*[®] – an automated solution for the production of dental prostheses. We are a small, yet international company with subsidiaries in Europe, America and Asia.

In support of our sustainable growth, we would like you to join our team as a

CAM Application Engineer (m/f/x)

Your tasks:

- 1st and 2nd level support for our users and partners
- Presentation of our solutions
- Development of milling strategies for the range of dental indications using various materials and different milling machines
- On-site support and introduction during installation of our products onto customer systems
- Documentation of work results
- Provision of structured feedback to product management and development team

Your qualifications:

- Professional training or proven experience in the machining area
- Additional qualification as a CAM programmer – ideally with *hyperMILL*[®] and/or *hyperDENT*[®]
- Experience with additive manufacturing would be a plus
- Independent, structured and thorough work method
- Good language skills in German and English
- Communication skills
- Willingness to travel
- Ability to work well in a team, but also independently and with personal responsibility
