

FOLLOW ME! Technology develops CAM software that generates optimal input data for milling as well as additive manufacturing using digital models. We are focused primarily on the development of *hyperDENT*[®] – an automated solution for the production of dental prostheses. We are a small, yet international company with subsidiaries in Europe, America and Asia.

In support of our development office in Berlin, we would like you to join our team as a

3D Software Developer – Product Development C++ (m/f/x)

Your tasks:

- Maintenance and further development for our products and software components with a focus on kernel development in C++
- Project responsibility for product subcomponents
- Participation in architecture concepts for new development and restructuring
- Recording, discussion and documentation of software requirements
- Documentation of work results
- Involvement in various tasks throughout the complete software lifecycle

Your qualifications:

- Completion of a degree in computer science or mathematics (or a comparable course of study)
- Several years of project experience with C++ and 3D tasks
- Analytical mindset and pronounced interest in solving geometric and graphical problems
- CAD/CAM development experience is desirable
- C# and .NET/Windows Forms/WPF knowledge is advantageous
- Structured, quality and results-oriented work approach
- Ability to work well in a team, but also independently and with personal responsibility
