

FOLLOW ME! Technology develops CAM software that generates optimal input data for milling as well as additive manufacturing using digital models. We are focused primarily on the development of *hyperDENT*[®] – an automated solution for the production of dental prostheses. We are a small, yet international company with subsidiaries in Europe, America and Asia.

In support of our sustainable growth, we would like you to join our team as a

Software Quality Assurance Specialist (m/f)

Your tasks:

- Responsibility for test management
- Structured integration tests for our products
- Design and further development of our automated test environment
- Preparation and presentation of quality results
- 3rd level support for application engineering
- Support for the development team during configuration management
- Further development of installation routines for our products, if necessary
- System administration of our infrastructure, if necessary

Your qualifications:

- Degree in Computer Science (IT Specialist), Mechanical Engineering or comparable degree
- Several years of professional project experience in test management
- Experience using tools for test automation
- Structured and thorough work method
- High quality standards
- Good language skills in German and English
- Some programming knowledge
- CAD/CAM experience is desired
- Knowledge or interest in system administration rounds off your profile
- Ability to work well in a team, but also independently and with personal responsibility
